SKILLS

PROGRAMMING

Proficient:
Go • Ruby • Javascript
Good at:
Dart • C++ • Python • Shell
HTML5 • CSS3 • LaTeX

DEVOPS

AWS • Docker • Terraform

EDUCATION

VIT UNIVERSITY

BACHELOR OF TECHNOLOGY IN ELECTRICAL AND ELECTRONICS ENGINEERING
May 2015 | Chennai, TN

EXPERIENCE

GRAB | SOFTWARE ENGINEER

Jan 2019 - Present | Singapore

Digital Goods
- Cross team communication and integration with other grab services via gRPC
- Create infrastructure to run the services using Terraform, added DataDog monitors and alerts to manage high uptime

Tickets
- As an Engineering Owner (EO) held scrum ceremonies which empowered the team to collaborate effectively
- Performed AWS cost estimation for the project
- System design ideation to build golang microservices, setup DynamoDB and talk to 3rd party APIs
- Wrote golang application to run periodically on AWS lambda
- Setup Infrastructure, monitors, alerts and other release activities enabling the service to go live in SG

GrabWheels: e-scooter
- Improved infrastructure to scale out to 8.5k+ Daily Active User and reduce AWS cost by $10k/year
- Added features in operations portal build in React/Redux to filter and search the scooters, reducing the time to action by half

WEINVEST | SOFTWARE ENGINEER

July 2016 - December 2018 | Bangalore, KA

Advise Wealth
- EO, worked closely with product and design to create a service for Relationship Managers to engage, service and sell better
- A VueJS app with Ruby on Rails(RoR) services as the backend

OCBC RoboInvest
- EO of Client implementation, worked closely with product to whitelabel GrowWealth application for OCBC Bank
- Worked with design team to modify the React UI to match rest of OCBC website
- Setup shared AWS account and created the infrastructure to run the application

CGS CIMB eWealth
- Setup infrastructure and monitors to run GrowWealth application for CGS CIMB on AWS.

Grow Wealth
- One of the core members of the dev team responsible for development of robo advisory application from scratch
- BE of the app was written in Ruby on Rails and with Vue/Vuex in FE
- Iterated quickly to add or remove features based on user survey
- Worked with Product and Business team for multiple demos of the product

COGNIZANT | PROGRAMMER ANALYST

Sep 2015 - July 2016 | Chennai, TN
- Fixed multiple bugs in ASP.NET web apps for Emblem Health
- All code was reviewed, perfected, and pushed to production

ADDITIONAL PROJECTS

FLUTTER CHAT June 2020
- A Chat app made in Flutter framework using Dart lang, for both android and iOS.
- The app uses Firebase for authentication and message stream.

GRAB VENTURES WEBSITE Dec 2019 | Grab
- Worked with designers, interns, and other stakeholders to deliver the front page for GV to showcase the world their new ventures
- Designed a wordpress based theme, dockerized and deployed the application in staging and production environment

GET ANYTHING Oct 2019 | Grab
- A web app to request anything e.g. queue up for bubble tea, buy movie ticket, etc., the four-week beta resulted in 100+ orders
- A VueJS app for front page to request, ops portal to see all the requests in real-time and a data pipeline attached to DynamoDB for Analytics

GIFT BOT Jan 2017 | WeInvest
- A slack bot which can be used to gift peers in the same group.
- Integrated it with Stripe, so that group members can pay admin for gift card and use it themselves or gift them to other team mates.

ACHIEVEMENTS

2016   37th/20k   IndiaHacks: Open Source
2016   One of the winner of Open-Source Contributor Competition Surge 2016
